

Geotron UK is an independent specialist geotechnical and environmental contractor offering land drilling and vacuum excavation services

## Company Profile

We provide services to support our clients during environmental and geotechnical site investigation and contaminated land remediation programmes.

## An Introduction to our services

**Pre-Drilling** ◦ Service clearance by non-intrusive methods  
[CAT, GPR ETC]

◦ Service pit excavation by hand tools and vacuum excavation

**Borehole Drilling by Hand-Held Equipment** ◦ Hand augering and cased hand drilling

◦ Hand-held percussive window sampling

◦ Soil vapour probing and vapour pin installation

## **Borehole Drilling by Drilling Rig**

- Percussive/dynamic window/windowless sampling
- Direct push sampling, probing and instrumentation installation by Geoprobe rigs
- Hollow stem auger [WITH/WITHOUT DYNAMIC SAMPLING]
- Cased auger/cable percussion drilling [TRACKED RIG]
- Standard cable percussion [SHELL & AUGER]
- Open hole rotary drilling [WATER/AIR FLUSH]
- Rotary coring [CONVENTIONAL & GEOBOR S WIRELINE]
- Rotary percussive overburden drilling [CASED DTH]

## **Sampling, Testing & Installation**

- Soil sampling, on site screening and sequence logging
- In-situ geotechnical testing and sampling [SPT/U100/UT]
- Monitoring/remediation well installation
- Multi-level well installation [NESTED WELLS/CMT]

## **Post Drilling/Installation**

- Well development [PUMPING/AIR-LIFT]
- Pump/packer testing
- Well repair and cleaning/rehabilitation
- Surveying

## **Well Decommissioning & Reinstatement**

- Overdrilling, well extraction and backfilling
- Pressure grouting
- Concrete/tarmac reinstatements to highways specifications

## **Remediation**

- Direct push probing and remediation product injection
- Direct push installation of sparge points and injection wells
- Standard remediation well installation
